

GRACE MUSSIMBI

IT Support & Help Desk | Fluent French & English

Stoney Creek, ON • mussimbigrace@gmail.com • [linkedin.com/in/grace-mussimbi-a12173214](https://www.linkedin.com/in/grace-mussimbi-a12173214) • [Portfolio URL]

PROFESSIONAL SUMMARY

Bilingual (French/English) technical professional with a background in front-end and email development, moving into IT support. Experienced in ticket-driven workflows, debugging rendering and data issues across browsers and platforms, and working directly with clients to diagnose and resolve technical problems. CompTIA Security+ certified, with hands-on Windows Server and Active Directory lab experience built and documented independently.

TECHNICAL SKILLS

Systems & Directory: Windows Server 2025, Windows 11, Active Directory (lab), DNS, Group Policy (in progress), VMware Workstation

Networking: TCP/IP, static & DHCP addressing, subnetting, default gateways, DNS resolution, Windows Defender Firewall, ping / ipconfig / arp / tracert

Scripting & Query: PowerShell, SQL, JavaScript, HTML, CSS, Ampscript, Apache FreeMarker

Platforms & Tools: Microsoft 365 / Office 365, Salesforce Marketing Cloud (Email Studio, Automation Studio, Contact Builder), MessageGears, Luminate Online, Litmus, Jira, Photoshop

Support & Process: Ticket intake, triage & escalation, incident documentation, QA verification, client communication, technical documentation

CERTIFICATION

CompTIA Security+ (SY0-701). Certified August 2026.

TECHNICAL PROJECT

Active Directory & Windows Server Home Lab

In progress, 2026

- Built a virtualized Windows Server 2025 and Windows 11 environment in VMware to prepare a domain controller and two client workstations.
- Configured static IPv4 addressing, subnet mask, gateway, and DNS on the server using PowerShell (New-NetIPAddress, Set-DnsClientServerAddress); selected an address outside the DHCP scope to prevent conflicts.
- Diagnosed and resolved two-way connectivity failures: identified that an ICMP firewall rule was enabled only for the Domain profile while the machines were on a Private/Public network, and cleared stale ARP entries that were masking the corrected configuration.
- Documented each task with configuration, method, verification steps, and redacted evidence. Full writeups published at [Portfolio URL].

EXPERIENCE

Customer Service Associate, FreshCo by Sobeys

Waterdown, ON • Feb 2026 – Present

- Resolve customer questions and issues at point of contact in a high-volume retail environment.
- Communicate with customers and colleagues in both French and English to resolve concerns efficiently.

Production Associate, Display Finishers Limited

Toronto, ON • Sep 2025 – Oct 2025

- Supported daily production operations and assisted machine operators to maintain workflow and quality requirements.
- Completed hard wiring tasks, connecting and securing components to job specifications and safety standards.

Email Producer, Rakuten

Toronto, ON • Oct 2023 – Dec 2023

- Built and maintained responsive email templates using HTML, CSS, and Apache FreeMarker in MessageGears.
- Wrote SQL queries to pull and segment recipient lists based on customer profiles, behaviours, and event triggers.
- Troubleshoot technical issues across campaign builds, including rendering and data-driven content errors, and validated fixes before release.

Email Developer, University of Toronto

Toronto, ON • Apr 2023 – Sep 2023

- Organized and tracked incoming work through the internal help desk system, logging each request through to resolution.
- Coded new templates and updated existing ones in Luminate Online; assisted with website updates using HTML and CSS.
- Tested output for cross-browser and cross-client compatibility, diagnosing and correcting rendering inconsistencies.

Front End Developer, Vigorate

Toronto, ON • Jul 2022 – Aug 2023

- Built and modified campaigns in Salesforce Marketing Cloud using HTML, CSS, and Ampscript within Email Studio.
- Configured automation in Automation Studio for client-specific data transformation and extraction.
- Tracked build requests, bugs, and release tasks through Jira, working to checklist-driven QA and deployment procedures.

Email Developer, FCB/SIX

Toronto, ON • Jul 2022 – Aug 2022

- Developed, tested, and debugged responsive templates in Salesforce Marketing Cloud using HTML, CSS, and Ampscript.
- Troubleshoot rendering and performance issues across browsers, email clients, and devices; logged and documented QA findings in Jira.

EDUCATION

Computer Science coursework, Thompson Rivers University

Online • 2025

Supply Chain Management coursework, Yorkville University

Online • 2024

Bachelor of Arts, Sociology, York University

Toronto, ON • Jun 2022
